- **Windows Server 2012** (Essentials, Standard, Datacenter)

## WHERE TO DOWNLOAD MY PRODUCT?

---

- Microsoft official website: [Server Download Links](#).

## INSTALLATION

---

After creating a bootable USB or DVD medium, insert it and start your computer. VirtualBox, KVM and VMware users only need to attach the ISO file during VM creation and follow the installation steps shown.

1. On the first screen, select **installation language**, **Time** and **keyboard layout** then click **Next**.
2. Start the installation by clicking on "**Install Now**".
3. Select the **Windows Server edition** to install and click **Next**.
4. Read the License terms and agree to them to start the installation by checking the box "**I accept the license terms**".
5. If this is the first installation of Windows Server on the server, select (Custom: Install Windows only).
6. **Select a partition** to install Windows Server, you can optionally create new one from available or use total available size by clicking "**Next**".
7. The installation should start, wait for it to finish.
8. **The system should automatically reboot** after the installation. Set **Administrator password** when prompted on the next screen.
9. Click **Finish** to complete the installation.
10. To login with the Administrator user, use **Ctrl + Alt + Del** key combination.

## ACTIVATION

---

1. Type **CMD** in the **Start screen** to open elevated Command Prompt and choose "**Run as administrator**"
2. **Type:** DISM /online /Set-Edition:ServerStandard /ProductKey:XXXXX-XXXXX-XXXXX-XXXXX-XXXXX /AcceptEula
  - Set-Edition:ServerStandard : For **Standard Edition**
  - Set-Edition:ServerDatacenter : For **Datacenter Edition**
  - **Replacing** XXXXX-XXXXX-XXXXX-XXXXXX-XXXXX with your license key.

Sometimes the process stuck in 10% ... Please wait for 15-20 min then reboot your system and check.

## **THANK YOU FOR CHOOSING WHOLSALEKEYS**

---
